-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 02 December 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kumar (US Patent 6,283,572) in view of Silverbrook (US Patent 6,623,106).

4. Kumar discloses "a method of accounting for dead nozzle remapping in a multi-nozzle printhead [column 6, lines 63-66]."

5. Thus Kumar meets the claimed limitations except "including remapping a fixative intended for a dot to be printed by the dead nozzle", "wherein the remapping includes

Art Unit: 2861

remapping the fixative to an operative nozzle to which dot data", and "wherein the remapping includes preventing output of fixative onto the position where the dead nozzle would have printed a dot had it been operative."

6. Silverbrook teaches a printhead for an ink jet printer with two rows of nozzles for each color, wherein one of the colors may be a fixative [Table I]. The Silverbrook reference discloses that "a fixative is required for high speed printing applications on plain paper. When a fixative is used it should be printed before any of the other inks are printed to that dot position [column 6, lines 45-49]." If the dot data intended for a dead nozzle is remapped, there is no need for the fixative intended for that data. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide a method of remapping the fixative along with the dot data intended for the dead nozzle. One would have been motivated to modify Kumar to prevent the waste of fixative as taught by Silverbrook.
